INSPECTION NOTES. (4)

(Mysore, 11th July 1901).

Before starting on my inspection this morning I had a discussion with the Health Officer, Vice President, and President. We decided that, as suggested by the Senior Surgeon, houses in the neighbourhood of those infected should also be disinfected. The inmates of the houses might be removed to Veranna's Lines and their clothes disinfected in the steam boiler

X X X

Passed through Bellikatige Missal and other portions of Devaraja Mohalla and noted the improvements effected by the Municipality in the way of opening out lanes and removal of block of houses in the congested portions of this Mohalla.

Went to the Fort and from there to Doddapetta and Ragimandi inspecting two houses which were being disinfected. The disinfection being done in a thorough and business-like manner.

// Inspected the Laskar Mohalla Gunta which has been filled. This is a great improvement and cannot fail to improve the health of the locality. I should be glad to see the sides sloped and more earth put in the old bed of

This is very necessary. Another necessary work is that of house disinfection. All the houses in the affected locality must be thoroughly cleaned, whitewashed & if possible ventilated. Orderly cleanliness is another tendency, as much as Sanitation itself, the people must be advised to keep their clothes & themselves scrupulously clean —

(1) This is exactly what is being done by the disinfecting staff.

(2) I will ask the Medical & Sanitary Officers to explain to the people their essentials of personal hygiene

[illegible]

the Gunta so as to prevent rain water collecting on the site

5 Thence went to Erangere. The President was advised to take up the Holia houses near the Roman Catholic Chapel and remove the whole block. It would have been an easy task if the work had been taken up last year as advised by me. The inhabitants had camped out and were getting accustomed to live outside the town. Now they have all come back and may put a higher price on the houses than they did last year. But the Vice President assures me that they can be persuaded to take the price settled last year. I think there should be no further delay in acquiring and removing this block as a whole.

4 The cost will not fall entirely on the Municipality. I have noted in the list appended how the cost is proposed to be recouped to an appreciable extent. The Vice President has given a long list. I think all the improvements are necessary, but for immediate action I have selected 4 blocks and given them in the order of their importance. In all these the cost will be made good to some extent by re-sale of sites with a condition that they should be kept open or only such buildings should be

* Vide Statement appended -

put up as may be approved by Government

The Senior Surgeon joined me at this place, and with him I went over the Doddakere bund discussing on the the question of deepening the tank and putting up a bund across so as to cut off the portion near Bowen's Bavdi which should be gradually raised and planted up.

Inspected the Benneharadanahalli Channel which is being restored. I am not sure if the Channel is not made wider than is necessary.

Went over to Chatnahalli Camp inspecting the houses and sheds built by the Plague department as model houses for the poorer classes. Next inspected Veranna's lines to which it is proposed to shift people whose houses are being disinfected.

Asst Secretary to
To the Secretary for
Submission to the
Dewan

12/7/1901

Submitted to the Dewan
12/7/1901

This is a failure - There are four different gradations of houses costing Rs 800 to Rs 2000 - a waste of money - I will never do for the people intended - This was my opinion which I expressed when I saw the Chief Secretary when I saw him on the 11th July 1901

The Asst Secretary will please note that the expenditure was on these model houses only about Rs 2800 each

I do not know how the Dewan speaks but they were a failure I thought otherwise when I saw them last on 11th 12/7/1901

4

Memo furnished by the President of the Mysore City Municipality.

---

1. A loan of Rs 1,17,255/- was sanc-tioned in Government Proceedings No. 12970-72 dated 11th April 1898. L.F.204-93

Out of this loan, a total length of 5 miles 5 furlongs and 16 yards of new roads as well as conservancy lanes have been opened. For about 3 miles of this length drains on both sides of the road have been construct-ed 76 condemned houses have been demolished.

2. A second loan of Rs 39,000/- was sanctioned in Government Proceed-ings No. 3039-92 dated 28th August/00. L.F.3036

Out of this 128 condemned houses and 82 houses required for opening out new roads have been demolished in addition to 46 houses demolished from Municipal and Provincial Funds, thus making a total of 256 houses demolish-ed. The above number includes 46 houses demolished since the present recrudescence of plague i.e, from the 16th May last.

30 acres of land have been acquired to extend the City.

3. About 767 privy-pits have been filled up leaving about 6040 open and covered pits in the City. Of the latter

Measures satisfactory. But this investigation will not be complete till we ascertain what built-space was substituted elsewhere for the space vacated thus removed. Otherwise overcrowding will be the result as it occurred in Bowpet & also in Mysore

latter number about 1000pits have been cleared up to date. 150 new latrines have been constructed as provided in the Municipal bye-laws.

These must be done gradually

About 1000 persons have been served with notices calling upon them to build such latrines. 36 persons have been prosecuted for non-compliance.

28 public and about 2350 private latrines are daily conserved.

4. Out of the loan of Rs 39,000/- above referred to, Rs 10,548/- are still available and it is estimated that the removal of the most congested block in the City will cost about 85,700/- Rs for which funds are wanted.

1901

To the Secretary

1/n 5
4 #3
2/4/5 Please reply to the President: I say that no modification was intended to be made in G.O. dated 25th July. I will again inspect the Walagapse as desired by the Govr and see if there is necessity for modifying the order. There are one or two points in the Sr Surgeons letter which require Consideration & the publication of the letter thereon before I have formed an opinion on them would commit them to some extent to particular line of action. My inspection note will explain what I mean

[signature]

RD 22/9/01 L78

I have no objection with order as proposed by the 1st Councillor to be issued. And as he happens to be in Ceylon now I would suggest that he visit the Valagapse block & consider the suggestions of the Senior Surgeon - If at a less cost the requirements of health are met I do not see the advisability of spending more money over it - which same money may be utilized for some other purpose. This is however a suggestion to be considered by the 1st Councillor.

The Senior Surgeons letter is 20 pages full of valuable advice that should be printed & placed with Govrs papers

Mysore 12 Aug 1901

From Rev. J. Stanislaus S.J.

To the Plague Commissioner

Bangalore City

Sir,

Last year the Plague Committee having decided to remove the houses situated to the north of the Catholic church at Mysore, and to give the site to the catholic church, a meeting was held at the Priest's quarters, to settle definitively the question, on the 20th Dec. 1900

The meeting was presided by you, and with you were present M Madiah, V. Achyutrao The V. President, Rev. Holdsworth, Mr Standish Lee, M Hays., a few others, and myself.

On my being asked by you how much the Catholic Mission could contribute towards the work in view, I answered 3000 R and Dr Achyut Rao who in the circumstance acted as your Secretary wrote under your dictation all the particulars of the meeting

But a week ago, when the V. President informed me that the project was to be

carried into execution. I learned that according to a new decision the Catholic Mission must pay 4000 Rs.

To arrive at this decision it was said that I had promised that sum (Rs 4000)

I have never promised to pay 4000 Rs.

The Catholic Authorities whom I consulted at once, have already sent the reply that the Mission will not give more than 3000 Rs

I have the honor to be

Sir

your most obedient servant

J LeTohic

I distinctly remember it was only 3000 Rs but I just down 4000 on Mr Ramasundaram's telling me that the amount

Hr. President City Municipal Commission

To

N. V. Narasimhayyah Esqr.
Secretary to the Govt. of Mysore
General and Revenue Depts.

Sir,

With reference to Government Proceedings no 1285-88/L.B.(P) 198-207 dated the 25th July 1901, sanctioning Rs 32,256/= for removing the marginally noted four blocks in the city, I have the honor to state that the Officiating Senior Surgeon and Sanitary Commissioner with the Government of Mysore, inspected them and agreed to the removal of the Patuada Gaingatere and Earanagere Hologere blocks completely as decided already. He, did not however, think it equally necessary to remove also the other two blocks completely and suggested to the Vice President who accompanied him over the inspection, that the available amount would be better utilized for opening out streets in the same blocks as well as in other adjacent congested blocks with a view to give to all the remaining houses air and light and also Conservancy lanes. I am pushing on with the work on this modified plan in anticipation of

Block No 1 Lanigatere
" 2 Hologere Eranagere } Lashkar
" 3 Patuadagangatere — Devaraj
" 4 Valagadatere — Krishnaraj

of Government approval, which, I beg, may be kindly accorded.

The Senior Surgeon also inspected the galapuxie Extension and approved of the allotment of Sites made there. About 100 persons have already purchased Sites and agreed to start building houses thereon

No 176P

Dated 6th September 1901

Sir,

With reference to the present plague epidemic in Mysore, and the means best calculated to combat it, and especially with reference to what is being done there with a view to improve the sanitation of the city, I have the honor to offer the following remarks.

2. At my last visit I was accompanied during my peregrination through the city by the Executive Engineer, the Vice President, & the Plague and Health Officers. It appeared that there was a proposal before the Municipality which involved the complete clearance of four of the worst blocks in the city, and that the Vice President had already begun to carry this proposal into effect. So we visited these blocks first. My intention in visiting these blocks was to see whether it were possible to so open them up by making parallel lanes through them that they might be rendered fairly healthy at a rate cheaper than that involved in their total removal.

3. Two of these blocks, the Erengere and Govlagere are near the convent; nothing seemed possible to be done with the former save its demolition, but the latter of much less extent seemed capable of being rendered healthy by making a wide road behind it along the convent wall and thus provide for the admission of the conservancy establishment and the ready removal of rubbish.

4. The third block on the high ground opposite the city hospital was already in course of demolition and any how was

quite

quite beyond improvement by any other course than that which being carried out.

5. The fourth block (Walagagere) seemed quite capable of being opened up, and the Municipality had already made many roads through it by which the houses remaining were being made accessible to the conservancy establishment. New roads were in process of construction and I expressed the opinion that if this road making were carried out as it was apparently intended should be done , this congested locality would become a fairly healthy one.

6. We then visited most of the worst places and the Vice President pointed out the work that was being carried out and that it was proposed to carry out. I was surprised at the way the interior had been opened up since my inspection of the place last year.

7. This process of opening up the town by conservancy road meets several sanitary requirements, viz. the removal of many insanitary houses, the placing of these left behind within easy access of the conservancy establishment as well as admitting light and air to those houses, and opens up the possibility of an effectual drainage system for the town. Having thus made roads through the congested areas drains may be led along them into which the branch drains from the adjacent houses may be led without leading them under any houses at all. But, as pointed out by the Executive Engineer, these lanes ought to be aligned with due regard to the contour of the surface so that they may finally lend themselves properly to the purpose of drainage.

8. And then as to the drainage itself, Mysore seems to me to be exceedingly well adapted for drainage. The contour of the surface is practically perfect for this purpose. Such drains as exist at present do very little real drainage. They all allow so much soakage into the soil that except in times of torrential rains very little of the sewage ever reaches the mains-it practically all soaks into the earth. It is very doubtful

whether

whether such drainage is of any real value except for the removal of storm water. I would strongly recommend therefore that all drains to be laid in future be laid on a water tight bed. Drainage by pipes could easily be carried out were the water supply sufficient. This system is a partial success in the Fort in Mysore, where it has the least chance of succeeding If such a system were laid down with the same care in the city generally, and adequate flushing provided, an enormous stride would have been taken in making Mysore a healthy city. The system of opening up the city by parallel roads will bring pipe drainage within the range of practical engineering.

9. A point prominently brought forward by the Executive Engineer was the necessity of suitably and immediately providing proper drainage for the new extensions, otherwise they will very rapidly become sewage-logged just like the old city. I cordially endorse his opinion on this matter; If new extensions are to be opened up, their proper sanitation should go on pari passu with their progress in other respects.

10. While ventilating the city in the manner I have described by the construction of numerous parallel roads separated by only one or two houses, is a most excellent plan of improving the city, I still hold as I did last year that the clearance large areas to be enclosed by fences and kept as lungs for the crowded surroundings ought to be steadily kept in view. after some years exposure in this way the necessity for rebuilding on these areas again arose, rebuilding might be carried out under adequate sanitary supervision.

11. The question of disinfecting wells was also discussed with the Health Officer, especially in regard to recent complaints in the press as to the manner in which such disinfection has been carried out. I found that the Press had greatly exaggerated the disinfection scare. It will always be possible for interested or mischievous persons to raise difficulties of this sort in the way of the health authority. In the present instance the outcry against permanganate disinfection blazed abroad as it was so called educated persons amounted merely to an exhibition of the ignorance of the Shouters in the simplest

scientific

scientific matters.

12. However, I advised against the disinfection of private wells to which the public had no access except at the request of the owners. The possibility of such wells becoming infected by subsoil communication with remote public infected wells is so small that I do not consider the question worth consideration at present.

13. All public wells in Mysore should be closed by covering them in with granite slabs overlaid with a thick layer of earth. I do not advocate their being filled up because they might be of use some day or other. But at present they are a gratuitous menace to the public health, seeing that a good water supply is everywhere available from the Cauvery supply.

14. I may perhaps here repeat my warning in my last report as to the necessity for protecting the public water supply of Mysore from contamination- contamination to which it is daily and hourly liable. I mentioned this fact to a gentleman in Mysore at my last visit, and he replied " Oh, have we not got an excellent filtering system through which the water must pass before its distribution and by which all hurtful organisms must be arrested." This is a terrible delusion to labour under. The filter beds have their advantages, but they cannot be expected to do every thing- and one thing they must not be expected to do, viz- to render safe a water infected with commabacilli (cholera germs). So the lesson is- protect the water from its contamination throughout whole course from the Cauvery to the filter bed- cover in the open channel, erect a proper railing round the reservoirs and filter beds- and then the latter can be trusted to do just what they can do.

I have the honor to be
Sir,
Your most obedient servant

Sir,

As requested in your docket No 4208/L.B.(P)765 dated of the 6th September 1901, I have the honor to submit herewith the explanation of the Vice President together with a copy of the Proceedings of the meeting of the Sub-Committee in regard to the amount of Contribution promised by the Revd J. Le Lohic, Roman Catholic Priest, Mysore, for the Site proposed to be acquired and added on to the Church in Nalagere and to request that orders may be kindly obtained in the matter.

I have the honor to be
Sir,
Your most obedient Servant

A. Ramanuja Iyengar
President

From CWR to SY II
A. Nanjunda Raj Urs Esquire
Vice-President

To. A Ramanuja Iyengar Esquire
Offg President, city municipal
Commission, Mysore

Sir.

With reference to Secretary
No. 4208/LBP755 dated 6th September 1901
forwarding a copy of letter dated 12th
August 1901 from Rev J Le Tohic, Roman
Catholic priest, Mysore, stating that the
Contribution promised by him for the site
proposed to be acquired and added on
to the Church in Hargere Kaugere, to
Rs 3000 and not Rs 4000 as entered in
Govt Proceedings No. 1285-88/LBP198-201 dated 25th
July 1901, I have the honour to state
that the Sub-Committee appointed by
the Board to Consider the question of
the removal of the block of Sheiers
houses to the north of the Roman
Catholic church

met at the above place, where the Plague Commissioner, Sanitary Superintending Engineer, the President, Health officer and others were present.

In the meting it was decided to remove the block in question entirely and allow the site to be added on to the Roman Catholic church Compound receiving Rs 3000 as Contribution. A report was drawn up to that effect by the Sub-Committee and placed before the Board for approval. The Board rejected the proposition and upon this the President addressed the Government strongly recommending the removal of those houses but they were not pleased to sanction the same. Then the question was dropped altogether.

Serious loss 3 lakhs to the Municipality

3 Soon after the outbreak of Plague for the 3rd time, the Senior Councillor visited the City and was pleased to decide the Complete removal of the four blocks of houses.

given in the above Govt Proceedings.

4 While drawing up the memo, he asked me whether the Contribution promised by the priest was not small Compared to the Expenditure to be incurred for the removal of the block in question and I suggested that Rs 4000 might be asked to be Contributed instead of Rs 1500, as the Board lately decided to levy half of the entire Cost as Contribution, if applications were to be received from persons who want to remove Congested houses in order to improve their surroundings and add the site on to the Compounds of such applicants. He approved of the suggestion and took note of it

I have the honour to be
Sir
Your most obedient servant

The President, City municipal
Board mysore,

Encl. to Sl. 11

Sir,—

We, the members of the Sub-Committee appointed under resolution 4 of Proceedings dated 24th November 1900, have the honour to report as follows:—

That the Sub-Committee met on the 20th December 1900 and the members present were:—

1 The Vice President
City Mul Board
2. The Offg. Civil Surgeon
3. Mr M. Ananthanarajia
Mul Commrs

and the member absent was Mr Shaik Ibrahim Sab, municipal Commissioner.

That the question of acquiring insanitary houses in Baraagere was discussed and the Plague Commissioner, the Chief Plague Officer and the Sanitary Superintending Engineer were consulted on the spot and we arrived at a Conclusion:—

(1) That the whole of the locality containing huts about 150 in number, situated between the Roman Catholic Church and the Baraagere Holagere Street; the Com-

pensation

Compensation payable for them being estimated at Rs 14,000

(2) That the whole of this locality be cleared off these houses and Sites given to the house-owners free of cost in the Galapuxie Extension, the Municipality laying out main streets and Conservancy lanes and allotting Sites at the earliest opportunity. The unit for each hut be fixed at (50 x 20) ft.

(3) That owing to the poverty of the Koleya Community inhabiting this locality, it will be a help to them if the Compensation payable to them is paid in instalments instead of in a lump-sum and they are made to work themselves on their new houses in the Extension. They might also be induced to utilize the materials of their old houses. The plan of the houses to be built was approved of by the Sanitary Superintending Engineer and it may be adopted

(4) That the whole of the Compensation payable, namely, Rs 14,000/= may be placed at the disposal of the Vice President out of the Loan Fund and

and he may be empowered to draw sums as required - He will endeavour to Complete the houses within 6 months from this date.

(5) That the amount of Compensation payable to each individual house owner, will be noted in a Separate list and it may be one of the duties of the Vice President to see that the amount against each individual is not exceeded

(6) That the Site cleared of the house may be handed over to the Roman Catholic Mission on payment of Rs 3000/= and they may be made to bind themselves not to erect domestic buildings thereon. The materials of the existing huts are estimated at Rs 2000/=; therefore the net cost to be met by the Municipality, will be Rs 9000/-, excluding the value of the Site on the Galapuri Extension to be allotted free. The Vice President expects to effect a Saving on the Rs 9000/- now estimated as the total cost of the improvement under consideration

President, City Municipal Board
Mysore

To. H V. Nanjundayya Esquire M.A, M.L
Secretary to the Government of Mysore
Revenue and General departments.

Sir.

1. Ratnadagaranga Kere
2. Gowla-Kere
3. Alagadakere
4. Doxanagere Hobligere

With reference to the Govt proceedings No. 1285-88 / L B P 98-201 dated 25-7-1901 Sanctioning Rs 32256 for removing 4 Blocks given in the margin, I have the honour to state that the block called Granger Hobligere — Consisting of 122 houses for the removal of which Rs 13450 was sanctioned has been acquired for Rs 9450 and there is a balance of Rs 4000.

There are 44 houses in the opposite line of this block and the owners of these houses are also willing to go to Jalapura Extension if — Compensation is paid and sites be given there. The cost of removing these houses comes to about Rs 5250 and a list shewing the value of each of them is herewith submitted for reference.

If the Govt be pleased to Sanction

to Sanction the same, the cost will be met out of the Savings of the above Estimate of Rs 13450 and also the Contribution of Rs 3000 to be received from the Roman Catholic priest to whom the site thus vacated will be sold on Condition of his keeping the same vacant.

When acquiring the houses in the opposite line, only such of the houses require for the improvements, that is, for opening roads and lanes, will be removed and the rest will be kept and sold to better class of people who may be willing to purchase them. By doing this all the Holeyars by the side of Doddapetta road will be removed and this vicious class of Holeyars, whose habit is very unsanitary will be kept at a distance from the city proper

I request that you will be good enough

good enough to obtain the 34
sanction of the Govt. and
consummate the same soon, as
they are very anxious to
go there

I have the honour to be
Sir
Your most obedient Servant.

General & Revenue Dept.s

Sir,

I have the honor to invite your attention to my letter No. Rg 573 dated 13th Ultimo enquiring whether the additional grant of Rs. 1240/- sanctioned from State funds in Government Proceedings No 17423-4/23(P)/1770 dated 28th April last for the acquisition of houses in the Baranga Holagere in the Mysore City, should also be charged provisionally to Plague funds subject to future adjustment in the same way as the previous grant of Rs. 13,450/-, and to request the favor of an early reply.

I have the honor to be

Sir

Your Most obedient servant

E R Eagles

Asst Comptroller
